

SILIT-ABS-90L

Anti-back staining on Denim washing

Description:

SILIT-ABS-90L is a special surfactant compound, suitable for anti-back staining on all denim washing , such as desizing, enzyme washing, stone washing, bleaching and other processes, prevent from dyeing stain, keep the bottom of denim fabric, pocket cloth, monkey and other positions clean. Has an excellent effect on anti-elastic lossing of denim, environmentally friendly and biodegradable.

Performance:

- Enhance 3D sense of the fabric, its visual effect after washing is obviously better than other similar products;
- Compared with previous products, it has a higher cleaning capacity for fabrics;
- After treatment, the fabric has clean, bright, 3D effect;
- Good anti-elastic loss effect, which can solve more than 90% problems of elastic jeans on the market;
- Biodegradable and no harm to the environment.

Physical and chemical characteristics

Appearance	White paste
PH (1% aqueous solution)	4.0±0.5
Ionicity	nonionic
Solubility	Dissolve in water
Solid content (105℃×3h)	92-95%

Reference process

Process name	Dosage for Reference (600 lb water washer)
Disizing, Enzyme washing ,Cleaning	100-300g / machine

Package and storage

120kg/Drum.

Store in a cool and dry place where is below 25℃, avoid the direct sunlight, and shelf life is for 12 months under sealing conditions.
